Relaxing Moments & Natural wellbeing

Harvia is more than a sauna. It is a comprehensive experience that lets you enjoy the presence of nature and the natural well-being that stems from Finnish sauna traditions. In a Harvia sauna, the essential elements of nature – wood, stone and water – combine to create a relaxing oasis of well-being.

The soft heat provided by saunas produces positive health effects. It improves blood circulation and immunity, relieves muscle pain and headaches, reduces stress and relaxes, both physically and mentally.

The soft and steady heat emitted by the heater is the heart of the perfect sauna experience. The heater is the heart of your sauna – the source of relaxing heat and steam. Harvia's popular heaters have always been pioneers – elegant, durable and economic. All Harvia heaters are also equipped with an exceptionally efficient and controlled air circulation system that warms up the heater and the sauna quickly.

We value nature and its diversity. That is why we want to take care of its purity by developing products that are as environmentally friendly as possible. Harvia's versatile range of electric heaters makes it easy to choose a heater that suits your needs.

Relax in the heat of Harvia's electric sauna heaters

The sauna is a place of relaxation where you can enjoy the best soft sauna bath. At its best, a sauna heater is a part of the decor; the heart of the sauna that gives the best heat and serves the bather for a long time.

Harvia's popular electric heater models are designed to give you the best sauna bath experience in daily use, year after year. Every heater contains top-of-the-line technology and is economical and pleasant to use. Our extensive selection contains heaters for all decors as well as solutions for small saunas, family saunas and large public saunas alike.

The quality of Harvia electric sauna heaters is a result of decades of cooperation

At Harvia, we are inspired by the sauna and the comprehensive sense of well-being brought on by its heat. That is why we want our electric heaters to always provide you with the best sauna experience.

We invest in continuous product development and research to ensure the high quality and safety of our products. We only use first-class components, paying attention to every detail. The usability of our sauna heaters and their appearance that suits the decor will ensure a pleasant sauna bathing experience. You will be sure to find a suitable heater from Harvia's selection of electric sauna heaters and their accessories.

Selecting a heater

The electric heater is part of the sauna's interior design and ambience. Find the right design for you from Harvia's range of electric heaters. A properly built sauna room is a very important factor in getting the most out of your heater. The stove power is selected based on the size and material of the sauna.

An average of 1 kW of power is required for each cubic metre of sauna volume. The power requirement increases if there are window surfaces or heat-storing surfaces such as brick or concrete in the sauna.

A handy tool is available for these calculations at www.harvia.fi/en/selecting-heater/

Original Harvia sauna stones

Harvia sauna stones are selected according to old sauna traditions, and they provide bathers with gentle heat and steam. Electric heaters and woodburning stoves must absolutely use massive, split-face sauna stones, as they store plenty of heat and make the water thrown onto them vaporise efficiently on the broad fracture surface. Angular split-face stones also allow for loose placement of the stones, which is very important particularly in electric heaters in order to make it possible for the heat to be conveyed to the sauna room through the gaps between the hot stones and heating elements. Good air circulation in the stone compartment makes the electric heating elements last for as long as possible. Light (ceramic) and soft (soapstone) sauna stones do not produce the desired results. They also cause problems in electric heaters in particular, which is why their use is prohibited.

Harvia sauna stones are available in two sizes. Please check the product information to ensure the compliance of sauna stones.

Harvia heaters for family saunas

Enjoy a happy moment in the sauna with your family – or dedicate the relaxing sauna experience to yourself.

Design your sauna to suit the needs of your family and choose a suitable Harvia heater as its heart. The heaters in the Harvia family sauna range represent the well-known quality of Harvia: elegant, easy to use, durable and economic.

The new generation of Cilindro

Cilindro Plus, Cilindro Plus Spot

The **Harvia Cilindro Plus** electric sauna heater is an impressive pillar heater consisting of a massive amount of stones. The heater's outer casing reveals plenty of surface made of these stones. You can control the amount of steam and its heat by either throwing water directly on the stone pillar or on its side. The tall pillar heater is an impressive sight when embedded into the benches and its brushed stainless steel exterior gives it a finished look.

The PP70 and PP90 sauna heater models are equipped with illuminated operating switches and a child-proof function. The fixed operating switch is on the bottom front of the heater. The switch makes using the heater safe and easy. The child-proof switch is safe for families with children and the light on the switch is illuminated when the heater is either on or on a timer.

The E model sauna heaters (PP70E and PP90E) are controlled using a separate control unit, making the sauna heater well-suited for installation into the lower bench.

Harvia's PP70SP and PP90SP model heaters have been equipped with a new control unit integrated into the heater, which can be controlled using a wireless Spot control switch (delivered with the heater).

⚡ 6,8–9,0 kW 📦 6–14 m³ ⚖️ 90 kg

Model: PP70, PP90, PP70E, PP90E, PP70SP, PP90SP

Dimensions: width 310 mm, depth 310 mm, height 1020 mm, weight 11/12,2 kg

! For more technical information, see page 53

WIRELESS CONTROL

ON-TIME CONTROL

ON/OFF FUNCTION

NOVELTY!

Innovative sauna control

Spot, the wireless control switch

Harvia Spot wireless control switch enables the easy and safe use of the Cilindro Plus Spot sauna heater. The Spot switch has no visible cables and it is easy to install. The splash-proof Spot control switch can be installed inside the sauna or the washroom, in the immediate vicinity of the heater.

The stylish, illuminated control switch enables switching the heater on or off with just one light touch. The signal LED lights of the control switch show the mode of use. The heater's on-time can be adjusted (2h/4h/6h).

The radio signal range is 5–10 meters depending on the wall structures. Spot works on batteries.

Clean and easy to install. No wires or visible sensor components. Easy-to-use push button with a signal LED.

Pillar heater – a top-class steam giver

Cilindro

The range of Harvia Cilindro sauna heaters offers a great selection of affordable pillar heaters for family saunas. You can choose a sauna heater with or without an outer casing, with a built-in or separate control panel, and in black or white. The large number of sauna stones ensures an enjoyable sauna experience with all these options.

CILINDRO

CILINDRO EE

CILINDRO E

(Controlled with a separate control unit)

The **Harvia Cilindro** electric heater contains a massive amount of stones. Thanks to the grate-like outer shell, each user can adjust the nature of the steam: soft when throwing water onto the side of the heater and sharp when throwing water straight on top of the stone pillar. The Cilindro is impressive to both look at and experience. The operating switches are located near the bottom of the heater. Cilindro heaters equipped with a separate control panel are marked with the code EE. The code E, on the other hand, refers to sauna heater models controlled by a separate control unit.

RECOMMENDED PRODUCTS

(With the E model)

Xenio CX170 control unit

C150VKK control unit

CILINDRO H

CILINDRO HEE

The **Harvia Cilindro H** electric heater has an outer casing that is partially open at the front, allowing users to enjoy the benefits of a large stone surface and place the heater containing a massive amount of stones in a small space. You can adjust between gentle and sharp steam by throwing water in the middle or on top of the stone pillar.

The operating switches are located near the bottom of the heater. Cilindro heaters equipped with a separate control panel are marked with the code EE.

The **Cilindro F** model is surrounded by a closed outer casing made of galvanised steel. The casing shortens the required safety distances, making the heater fit into compact spaces and allowing the benches to be installed near it. This leaves room for creativity in designing a bench solution for your sauna. The heater is equipped with a built-in control unit, with the operating switches located near the bottom of the heater on the front.

A top-of-the-range heater with raw natural power

Kivi

The **Harvia Kivi** electric heater is an impressive piece of raw natural power. The source and the power of the Finnish sauna tradition comes from heating up a huge pile of stones. That is what inspired us as well. The Harvia Kivi heater combines centuries-old tradition with the latest technology to create the ultimate sauna experience. Thanks to the massive number of stones and the tall design, you can adjust the nature of the steam from soft to sharp by throwing water either to the side of the heater or straight on top of the stone pillar. Throw water on Kivi for a naturally powerful sauna experience.

This floor model heater has almost 100 kg of sauna stones, which has proved to be the right amount to offer hefty heat within a reasonable time. The stones are located in a two-part, triangular steel framework. This stylish design allows for the natural strengths of the stone.

The Harvia Kivi can be placed near the sauna benches, as its surface temperature is relatively low. You can also embed the heater in the lowest bench with the help of an embedding flange made from stainless steel that is available as an accessory.

The Harvia Kivi heater (models PI70 and PI90) is equipped with a separate digital control panel. This makes using the heater extremely simple and allows you to adjust the temperature to an accuracy of one degree, among other things. The control panel can be placed inside or outside the sauna room with a connecting cable. The length of the cable is 3 m (with 5 m or 10 m as options).

The Harvia Kivi models PI70E and PI90E are controlled by a separate control unit.

A new design that lifts up even the most stylish sauna interior

Glow, Glow corner

Harvia Glow pillar heater has been designed to meet the needs of even the most demanding sauna decorator. Choose the tall, pillar model Glow or corner-mounted Glow Corner as the eye-catcher of your sauna interior.

In addition to their aesthetic, Glow heaters also offer a pleasant sauna experience: the large stone quantity enables soft, comfortable steam. The heater's outer casing reveals plenty of surface made of the stones, and you can control the amount of steam and its heat by either throwing water directly on the stone pillar or on its side.

The Glow heater has clear, easy-to-use selectors in the bottom part of the heater. The heater is equipped with a manual timer and temperature controller. The heater is clear and simple to use.

Safe operation is guaranteed thanks to sensors integrated into the heater. The arrangement of the stones has no effect on the thermostat's operation, and the heater's operation remains more stable even after long use. Glow's thermostat will also quickly react to the stones cooling down, which means that the heating elements will switch on quickly, heating up the stones in time for the next sauna bath.

The Harvia Glow TRT70E and TRT90E as well as Harvia Glow Corner TRC70E and TRC90E models are controlled with a separate control unit.

A world-class innovation: The Globe heater

Globe

The **Harvia Globe** sauna heater offers you a pleasant sauna experience, not only through heat and steam but also through its unique design and excellent usability.

The Harvia Globe is also an example of environmentally friendly design: it is made from high-quality materials – sturdy stainless steel – and no harmful chemicals are used in its surface finish. A completely new way of thinking is also apparent in the design of the heater, which is made out of precisely laser-cut steel arches and rings. The amount of sauna stones is optimised: the heater heats up quickly enough without sacrificing the softness of the steam.

The Harvia Globe heaters GL70 (Ø 430 mm) and GL110 (Ø 500 mm) are controlled by a touch-screen control panel. Both the user-friendly touch-screen control panel and the highly accurate temperature adjuster have been designed for your convenience according to Harvia’s design principles. The splash-proof and simple yet stylish control panel can be installed inside or outside the sauna room. The heater includes a compact power unit, which provides electricity to the heating elements. The heater is connected to the power unit via a cable running inside an armoured tube. The heater’s temperature sensor is installed in the ceiling of the sauna room and connected to the power unit via a cable.

The Harvia Globe is also available as E models GL70E and GL110E, which are controlled by a separate control unit. The E models include a connection box for electrical input from the control unit. The heater is connected to the connection box via a cable running inside an armoured tube.

Supplied with a height adjustable stand.

Harvia Forte
– a sauna always at your service.

Just grab a towel, lift the Forte's cover and climb onto the bench to enjoy humid and gentle steam.

Perfect sauna enjoyment 24/7

Forte

The always-ready Finnish **Harvia Forte** heater provides you with a perfect moment of relaxation in no time at all to punctuate your hectic schedule. The Forte is Harvia's innovative version of the heat-storing electric heater, combining top-of-the-range heater technology with a sleek design. Just grab a towel, lift the Forte's cover and climb onto the bench to enjoy humid and gentle steam. Welcome to a stress-free zone 24/7.

The Forte is equipped with a separate splash-proof control panel. Thanks to the separate control panel, the Forte is extremely well-suited for being embedded into a bench. The Forte's new properties provide family saunas with a sense of safety. The heater will turn off automatically if you forget to close the cover, and the control panel has a keypad lock. The new ECO mode saves electricity, as it allows you to adjust the heater's temperature to a very low setting without turning off the heater.

HAF1

Easy-to-use wall-mounted heater

The Wall

Despite its output of up to 9 kW, **The Wall** requires only little space inside the sauna. This heater was created with a focus on functionality. Illuminated switches, durable construction and ease of installation make The Wall a great product. The total package is both compact and stylish.

The illuminated operating switches are visible and simple to use even in dim saunas. The Wall's structures and material are strong and durable. Its heating elements have their own support structure to protect them, preventing them from twisting and thus extending their lifespan. Components that are exposed to heat and moisture are located at the bottom of the stove. The heating element's structure is designed to withstand prolonged, efficient heating.

The unique Harvia mounting/wall rack included in the scope of delivery determines the minimum safety distance between the heater and the floor. Installation of the heater is quick and easy.

THE WALL

⚡ 4,5–9 kW 📦 3–14 m³ 🪨 20 kg

New heater with a steaming function for gentle and humid sauna

The Wall combi

This heater has been designed for you who appreciate humid sauna bathing and ambience provided by the sauna scents. Having sauna with a Wall Combi heater with an integrated steaming function is a multi-sensory experience with a versatility that cannot be compared. One heater provides multiple ways of enjoying sauna. Wall Combi -heater adapts to your personal, friends' and family's sauna preferences. Enjoy sauna just the way you like it.

Enjoy steady humidity

The Wall Combi sauna heater is a new heater equipped with a steamer in the wall heater range, which has become a Harvia product family in its own right. The integrated steamer of the Wall Combi heater generates and maintains steady humidity in the sauna – with precision down to the percentage. The steam makes the sauna heat more pleasant, providing a soft and humid bathing experience. You can add fragrances to the stone cup of the sauna heater.

-  4,5–9 kW

Soft and gentle sauna

Add water to the steamer and set the temperature to a lower level eg. 50–60 degrees of Celsius. Enjoy soft and gentle feeling provided by high humidity and lower temperature. You can enjoy sauna longer and relax in conditions that suit you the best. You can add fragrances to the stone cup of the heater to enhance the ambience.

Combined sauna

When the steamer is on you can adjust the humidity to the level that suits you the best. If you like a higher warmth adjust the temperature already to eg. 60–80 degrees. You can also throw water to the stones whenever you feel in order to enhance the feel of moisture and warmth.

Hot Sauna

Use Wall Combi – heater without the steaming function like an ordinary electric sauna heater- You can set the temperature high eg. To 80–100 degrees Celsius and throw water to the stones as much as suits you. The air in the saunarium is dryer and hotter.

MODERNA

A digital design heater

Moderna

The **Harvia Moderna** is the royalty of electric heaters. Thanks to Harvia's patented control technology, Moderna heats up your sauna quickly and silently to the temperature of your choosing. The Moderna heater keeps the temperature even throughout your sauna session. With its stylish design, the Moderna is also a beautiful decorative element. Choose from shiny black or luxurious platinum.

The Moderna is controlled by a separate digital control panel. It is equipped with illuminated switches and a digital display that shows the temperature you have set and the timer. The heater's On time can be set to anything between 2 and 8 hours, with the factory setting being 4 hours. The preset start time can be programmed to anything between 0 and 18 hours.

A heater behind the benches

Hidden Heater

Harvia Hidden Heater is a practical heater requiring very little space. It is mounted behind the benches and is therefore very well-suited for community saunas.

Optional accessories for Hidden Heater include a soapstone bowl and a flexible hose pipe. The heat remains comfortably even when water is conveyed to the heater little by little. The bowl is placed on the bench and water is poured into it. The hose pipe takes the water to the heater.

This heater is designed for heavy-duty use and completely made of high-quality stainless steel.

The Hidden Heater is controlled by a separate control unit.

Heaters for small saunas

Relax in a dimly lit sauna, surrounded by wonderful silence, the heat softly caressing your skin.

Even a small sauna can be great. You need not sacrifice quality and functionality even if space is scarce. You can find an elegant and user-friendly heater of a suitable size in Harvia's range of electric heaters. Design your sauna to be your own oasis of good feeling.

A masterpiece of ergonomics

Vega Compact

The **Harvia Vega Compact** is a true powerhouse heater for small saunas. The heater's operating switches are located near the top of the heater, making the heater easy and ergonomic to use. The Vega Compact can be installed particularly low on the sauna wall. This allows the heat to spread evenly throughout the sauna, ensuring that the lower benches also enjoy plenty of heat.

The Vega Compact is easy to install. Just install the wall rack, lift the heater onto it and secure it in place with one screw. The heater is made of stainless steel.

The Vega Compact models BC23 and BC35 are equipped with a built-in control unit.

⚡ 2,3–3,5 kW 📦 1,3–4,5 m³ 🌿 12 kg

Model: BC23, BC35

Dimensions: width 280 mm, depth 295 mm, height 505 mm, weight 7 kg

VEGA COMPACT

Small on the outside, big on the inside

Delta, Delta EE, Delta Combi

The **Harvia Delta** is a triangular, space-efficient heater, the design of which is based on the Greek letter delta (Δ). The stylish heater, made of shiny stainless steel, contains a generous amount of stones that give off a wonderful cloud of steam. Thanks to its design, the Delta can be placed in a corner for optimal utilisation of space. The heater is easy to mount on the separate wall rack included in the delivery. The Delta models D23 and D36 are equipped with a built-in control unit.

The **Harvia Delta EE** model is equipped with an illuminated digital control panel which makes the heater easy to use. The heater's On time can be set to anything between 2 and 8 hours, with the factory setting being 4 hours. The preset start time can be programmed to anything between 0 and 18 hours.

The range of Delta heaters also includes the smallest Combi heater in the world: the **Delta Combi**. This heater is created for bathers who appreciate soft and humid steam and a fragrant atmosphere.

⚡ 2,3–3,6 kW 📦 1,3–4,5 m³ 🍷 11 kg

Model: D23, D36, D23EE, D29EE, D36EE, D29SE

Dimensions: width 340 mm, depth 200 mm, height 635 mm, weight 8 kg

A stylish heater for small saunas

Unio

The large stone surface of the **Harvia Unio** heater ensures pleasant and humid steam in a small sauna, all the way down to the lower benches. The Harvia Unio is installed into a corner, and its output is 3.6 kW (230 V 1N-), which also gives flexibility to the electrical design. Heaters marked with the EE code are delivered with a separate splash-proof touch control panel that is easy to use. Heaters marked with the E code are controlled by a separate control unit.

⚡ 3,6 kW 📦 1,5–5,5 m³ 🍷 36 kg

Model: NK3601E, NK36EE

Dimensions: width 365 mm, depth 227 mm, height 1070 mm, weight 14 kg

! For more technical information, see page 63

UNIO

Harvia heaters for large and public saunas

A shared moment of relaxation in pleasant heat is a shared enjoyment. Heaters used in large saunas or on a continuous basis must be efficient and durable. The humidity and temperature in the sauna must remain stable for long periods of time. The capabilities of Harvia heaters intended for public saunas make them particularly well-suited for saunas in apartment buildings and terraced houses, swimming halls, spa resorts and large corporate saunas.

A sturdy floor-mounted sauna heater for professional use

Modulo

Harvia Modulo has been designed to tolerate and provide fantastic heat and steam. The sleek design and open stone surface of Modulo create an impressive sight. Modulo is a trailblazer product by the world's largest sauna heater manufacturer and a modern sauna decorator's choice.

Harvia Modulo heaters are easy to install. The heating elements are separated from the stones, which results in a long heating element life span. Replacing a heating element is a quick and easy task, as you can just pull out the entire heating element module. Other maintenance measures were also taken into account in the heaters' design from the very start.

All heaters can be equipped with a safety railing and a protective glass sheath. A protective glass sheath is not only stylish but also prevents water from splashing around the heater.

MODULO

⚡ 13,6–18 kW 📦 11–28 m³ ⚙️ 160 kg

Model: MD135, MD160, MD180

Dimensions: width 550 mm, depth 550 mm, height 805, weight 47 kg

ACCESSORIES

Safety railing
HMD1

Protective glass wall
HMD3

A long-lasting pillar heater for demanding professional use

Tall Modulo

Modulo is also available as an impressive, tall pillar that completely reveals its open stone surface. The tall model is particularly well-suited for saunas with opposite-facing benches – the tallness of the heater creates a sense of spaciousness in the sauna and makes it the eye-catching centre of decor.

The heating elements are sturdier than in most models, which makes them exceptionally resistant to the demanding conditions in public and spa saunas. The heater's output can be modified to either 16.6 kW or 19.8 kW. Harvia Modulo heaters are also easy to install. The heaters can be equipped with a stylish safety railing.

TALL MODULO

⚡ 16,6–19,8 kW 📦 15–30 m³ ⚖️ 220 kg

Model: MDA1654G

Dimensions: width 450 mm, depth 455 mm, height 1300, weight 61 kg

Strong, practical and simple yet stylish electric heaters

Virta

The Harvia Virta is the perfect choice for a medium-sized or large sauna when you want a sturdy structure, reliability and a sleek and modern design.

Their strong structure and exceptional ease of maintenance make Virta heaters excellently suitable for those who use the sauna often and like to enjoy the steam for long periods of time.

All connections to the Virta heater are made through the maintenance hatch on the front. There is plenty of room around the connections. The heating elements are separated from the stones, which results in a long heating element life span. If you need to replace a heating element, it is a quick and easy task, as you can just pull out the entire heating element module. Other maintenance measures were also taken into account in the heaters' design from the very start.

The **Harvia Virta** is a sturdy heater that provides soft steam for those who appreciate a traditional sauna experience. Three different power versions of the heater are available, the most high-powered version being the HL110, which is 7 cm larger in depth than the HL70 and the HL90.

⚡ 6,8–10,8 kW 📦 5–18 m³ 🍷 50/70 kg

Model: HL70, HLS70, HL90, HLS90, HL110, HLS110
 HL/HLS70–90 dimensions: Width 415 mm, depth 340 mm, height 810, weight 21 kg
 HL/HLS110 dimensions: Width 415 mm, depth 410 mm, height 810, weight 24 kg

Harvia **Virta Pro** models provide abundant heating power for saunas installed in spas, hotels and apartment buildings, for example. Thanks to its strong construction, heating elements divided into two groups and exceptional ease of maintenance, the Virta Pro heater is an excellent choice for heavy duty use.

⚡ 13,5–21,6 kW 📦 11–32 m³ 🍷 100/140 kg

Model: HL135, HLS135, HL160, HLS160, HL220, HLS220
 HL/HLS135–160 dimensions: Width 780 mm, height 810 mm, depth 340, weight 41 kg
 HL/HLS220 dimensions: Width 780 mm, height 810 mm, depth 410, weight 47 kg

VIRTA

VIRTA PRO

The **Virta Combi** is a combined electric heater and steamer that provides a variety of sauna experiences. You can select between a traditional Finnish sauna, a steam sauna, a herbal sauna or an aromatic sauna. The Combi heater is the right choice for those who enjoy soft and humid steam and the atmosphere created by fragrances. The water tank holds 5 litres – depending on the model, the tank is filled either by manually pouring water into the tank or automatically from a water outlet. The heater has a soapstone cup to hold sauna fragrances and a stainless steel grate for bagged aromatic fragrances. The Combi system is reliable and easy to use.

Heavy-duty Cilindro Pro heaters

Cilindro Pro

The **Cilindro Pro** electric heater gives off hearty steam in a family sauna, but the superior features of the heater are especially beneficial to public saunas, hotels and housing companies, for example. The impressive pillar heater contains a massive amount of stones, and the robust heating elements are designed to withstand long operating times. This guarantees plenty of hearty steam for large groups of users. When you want the most out of your heater, choose the professional quality of the world's largest sauna heater manufacturer.

The Cilindro Pro 100E/135E can be modified to either 10 or 13.2 kW. The Cilindro Pro 165E/200E heater, on the other hand, can be modified to either 16.6 or, when divided into two groups, to 19.8 kW.

The heater is equipped with a separate control unit.

Handmade – stories about steam

Legend

The **Harvia Legend** provides you with the ultimate sauna experience. This large heater takes you back to the origins of heaters – it is a heater in its purest form. The patinated steel frame of the Harvia Legend contains a large amount of stones that gives off great steam even in large saunas as it heats up. Due to the open structure of the stone compartment, you can throw water on the entire outer surface of the heater. The heat charged in the large number of stones allows you to throw more water even at a lower temperature – you can enjoy delightfully humid steam in your sauna.

Due to its circular shape, the Harvia Legend heater can be installed in the middle of the sauna or embedded into the bench. The heater is controlled by a separate control unit.

Effortless use of the sauna with control units

Harvia control units

Harvia control units make sauna baths – and especially preparing them – very relaxing. Harvia’s versatile selection of control units is sure to offer something for your needs, from reliable, manually operated one-heater basic units to new-generation digital units that control all the electric functions of your sauna – down to ventilation and lighting. Of course, this also includes perfect temperature adjustments – with one-degree accuracy – for you or a larger group of bathers, exactly when you want it. Let the world’s largest sauna heater and stove manufacturer take care of the technology and focus on enjoying a ready-made sauna experience.

Easy upgrading of your sauna with a control unit

Versatile use and connection to the building automation allows for use in many kinds of situations, such as remote use, and separate safety equipment, including door switches and additional safety equipment for the sauna heater. In the future, you will be able to replace just the heater, without replacing your control unit. An option for the control unit should be considered in the planning stage (cabling), as this will allow installation and use of a control unit at a later time.

Control with just a touch

Xenio

The **Harvia Xenio** control unit provides a modern and subtly stylish interface for controlling the heart of the sauna, be it a traditional electric heater, Combi heater with a steamer or infrared radiator. The compact yet clear touch control panel can be surface-mounted in almost any space – sauna, washroom, dressing room or even the living room. The control panel shows you when the sauna is at the right temperature for bathing.

Stylish and compact touchscreen control panel

Xafir

Harvia Xafir is stylishly small and yet clear. The touch control panel is easy to install where you want it: in the sauna, the shower room, the dressing room, or even the living room. Xafir is especially designed for home spas that include both an electric sauna and a steam room. Xafir's design is consistent with that of Harvia's steam generator control panel, ensuring a stylish overall look when the control panels are installed side by side.

Reliable basic control unit

C series

The control units of **Harvia C series** are manually used and reliable basic control units that allow you to easily control the temperature and the heater's on-time from 1 to 12 hours, depending on the needs of the sauna-goers. The control units can be used to control the heater of both family saunas and public saunas (2.3 – 17 kW). Reliable Harvia quality. The delivery includes a separate temperature sensor with a 4-metre cable.

Light up your life with colours

Griffin Colour Light

Harvia Griffin Colour Light is a new-generation digital control unit that enables you to control your colour light system and create a suitable atmosphere in your sauna. Lighting plays a major role in decoration and comfort. Choose the stylish, chrome-plated Griffin to bring luxury to your sauna experiences. Small and flat, the control panel can be installed in virtually any dry place.

Simply stylish control unit

Senlog

Harvia Senlog is a simply stylish control unit. Senlog offers an easy interface for controlling the heart of a sauna, the sauna heater. You can install the control panel in any dry space. With the Senlog control unit, you can control not only the heater but also the lighting and ventilation in the sauna room.

Add to the atmosphere of your sauna with lighting

Harvia lighting

Sauna lights

Choose from two colour options: steel or black. The stylish sauna light is a combination of steel and wood and measures 230 x 180 x 90 mm (width x height x depth). The package includes the lamp and a lampshade. Protection rating IP44, E14 bulb (max. 40 W) not included in the delivery.

LED strip

Indirect lighting based on LED strips is the perfect way to add to the warm atmosphere of your sauna. The LED strips can be easily integrated into sauna benches, for example into the backrest or the front edge of the upper bench. The LED strips are always tailored to suit the benches. The maximum installation height of the LED lights is 1,600 mm. The delivery includes the LED strips, connection cables to the transformer, a terminal strip and a transformer (230 V/12 V). The transformer must be installed in an IP44 rated case and no higher than 500 mm off the floor. A single transformer is enough for 10 m of LED strips.

Illuminated safety railing

Harvia illuminated safety railings increase the lighting, but also the safety of sauna bathers. Safety railing LED light strip illuminates the heater's stones impressively. Made of heat-treated aspen, the railings add a stylish and pleasant touch to the decor of the sauna.

Illuminated embedding flange

An illuminated embedding flange is the perfect pair for the bench-embedded sauna heaters. Made of stainless steel, the embedding flange also protects from the heat radiation, thanks to which the embedding hole is only slightly larger than the heater, making the integration look unified. The LED lights shining up from the bottom accentuate the fractured surfaces of the sauna stones, making throwing water on the stones a sight to behold.

Illuminated bucket – the brilliant container for sauna water

Harvia's illuminated bucket is a modern and practical container for water. It creates ambient lighting in the sauna – exactly where it is needed. You can either embed the illuminated bucket into the bench or mount it on top of the bench to ensure that it always has its own place in the sauna. The LED light in the base illuminates the bucket evenly, and the bucket also casts soft light on its surroundings. The bucket is made of optical plastic for optimal light dispersion. The bucket can easily be lifted off the base for refilling and cleaning. The separate base also ensures that the bucket's electrical components stay protected.

Luminous fibre optic lights – a stylish lighting solution

The Harvia Luminous fibre optic lights provide stylish lighting solutions for both saunas and steam rooms. The flexible fibre optics can be used to add a beautiful starry sky or a variety of graphic patterns to the ceiling or walls of your sauna. Luminous fibre optic lighting is available as different assemblies.

Complete your sauna with Harvia accessories

Harvia accessories

Embedding flanges

With a stylishly slick embedding flange, you can embed heater in the bench, giving your sauna an impressive and sleek look. Harvia Kivi, Globe, Glow, Forte and Cilindro E heaters can be embedded into the lower bench with a stainless steel embedding flange that is available as an accessory.

Sauna loudspeakers

Add to the atmosphere in your sauna with Harvia sauna loudspeakers. Connect the loudspeakers to your music player to enjoy your favourite music in the sauna. Harvia sauna loudspeakers are completely water-proof and well-suited for humid rooms, as their IP rating is IP65. Colour options: white or steel. Be sure to plan the wiring before beginning the panelling process. Tip! If you also install loudspeakers in the washroom and dressing room, you will be able to hear the music in every room.

Decorative stone wall

Harvia decorative stone wall helps you to easily create a stylish sauna. It can easily be attached directly onto the sauna panelling. Decorative stone wall is made of quality ceramic stone imitation. The size of the wall element, which is designed for Harvia's ready-made-saunas, is 534 x 1870 mm. The lower part of the decorative stone wall element is made of stylish brushed steel, on which you can mount a heater. Harvia also offers decorative stone wall for higher saunas. The size of this model is 534 x 2040 mm.

Autodose sauna water dispenser

Forget the bucket and ladle, here comes an automated water dispenser. Just relax and press a button to apply water onto the stones – with or without a fragrance. Spa saunas benefit from the even air humidity and the simplified approach to throwing sauna water.

The device consists of a main unit and operating buttons. The delivery includes one button for water and another button for a water-fragrance mixture. The device works either automatically at defined intervals or at the press of a button. When the device is in automatic mode and water is applied by pushing the button, the timer for the dosing interval restarts.

Design piping for the Autodose automated water dispenser

The stylish and modern Autodose design heater water piping is installed above the sauna heater. An unobtrusive special nozzle will direct the water on a large area, providing a fantastic sauna bath.

The simple design of the piping is well-suited to many different sauna interiors. The piping can also be integrated through the sauna's wall panel, thus hiding the piping and maintaining a clearer sauna interior.

The design piping is suited to heaters of different sizes and its distance can be adjusted based on the size of the heater. The design piping is compatible with the Harvia Autodose automated water dispenser, but it can also be used without (requires separate water control).

Sauna accessories

Harvia's broad range of products offers everything from high-quality clean sauna stones to buckets, and from thermo-hygrometers to sauna fragrances. Make the most out of your sauna experience with a set of sauna accessories.
